DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-4, 8-10, 22, and 23, drawn to determining an engine smoothness factor during an engine start event for an internal combustion engine, classified in class 701, subclass 113.
 - II. Claims 5-7, and 11-21, drawn to determining an engine smoothness factor in an engine start event for an accelerator-controlled engine, classified in class 701, subclass 110.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions of group (I) and group (II) are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of groups (I) and (II) being related as subcombinations usable together with each capable of use. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for group (I) is not required for group (II), restriction for examination purposes as indicated is proper.
3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 3747

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
